

In another moment of the radio-television program, the general director of the undergraduate program at MES, Dr. Reynaldo Velázquez Zaldívar, referred to the process of entering Higher Education. It was expected to develop it in the month of October of this year, but it could not be due to the delay in the completion of 12th grade due to the worsening of the epidemiological situation.

“The 12th grade students will finish their teaching in the month of December. Therefore, it is planned to dedicate the month of January to preparing for the Higher Education exams ”, he pointed out.

These exams will be held from February 1, 2022 to March 14..

From that period on, the following moments are included:

- Admission exams: February 2022
- Awarded: February - March 2022
- Incorporation to the SMA: March 2022

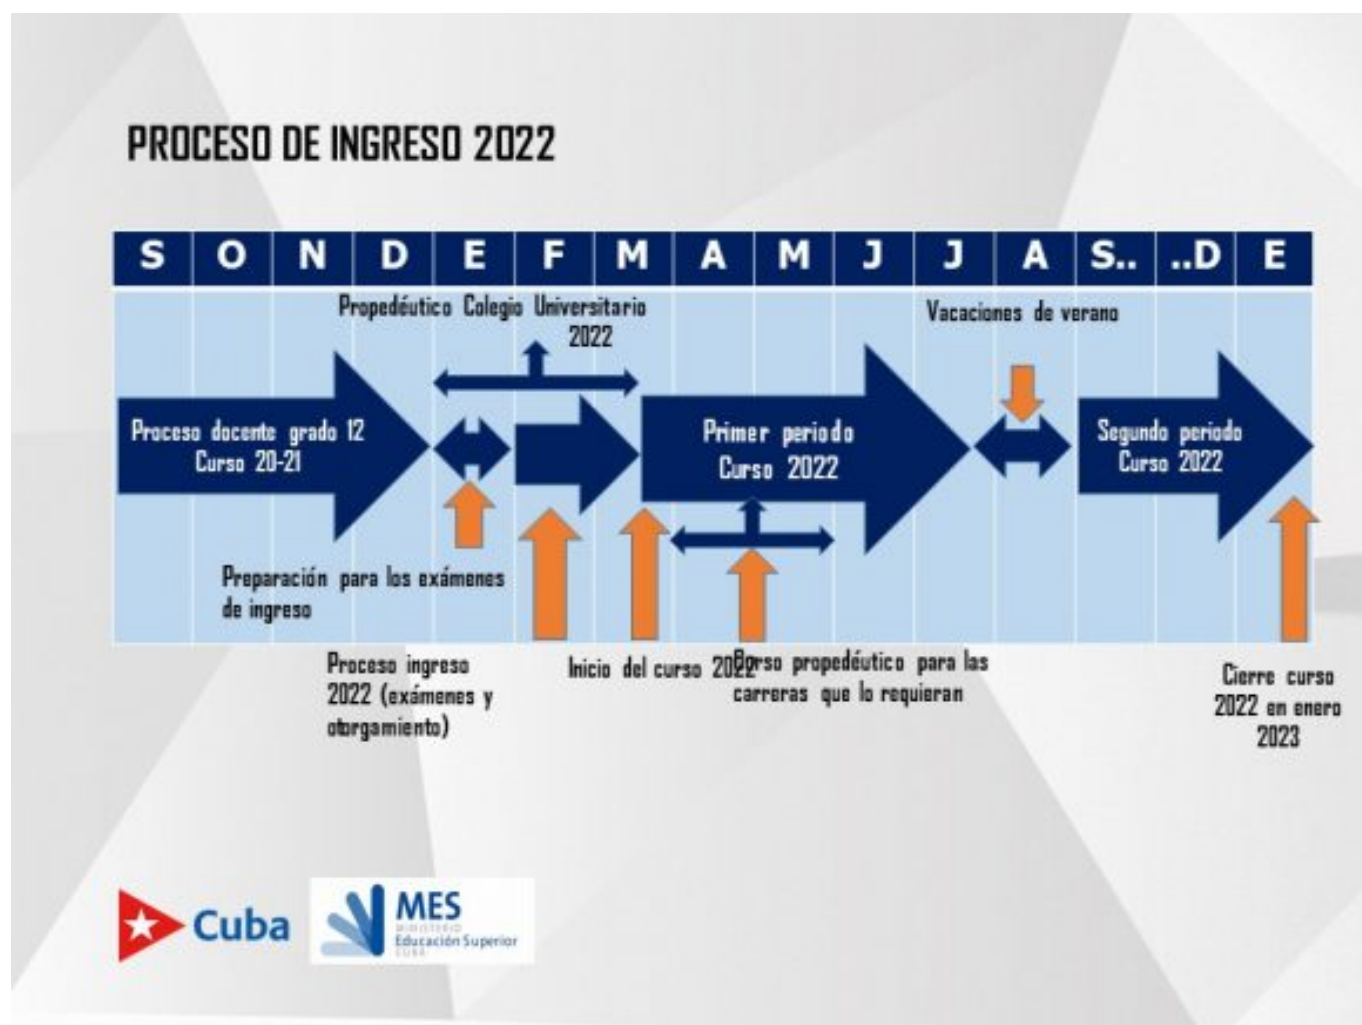

Students enrolled in the University College who receive their degree directly will take a preparatory course from January to March at the universities.

The 2022 course for this first year begins immediately after concluding the granting process (March 21).

Velázquez Zaldívar also referred to the students who are currently performing military service and will join the university, who already have an important period away from teaching.

Likewise, he commented that students who start this first year have had an 11th and 12th grade influenced by the pandemic.

"For next year, the course starts in March and ends in January 2023," he reported.

What will the admission process to Cuban universities be like?
